DETAILED ACTION

This office action is in response to an amendment filed 10/22/07.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 35 is rejected under 35 U.S.C. 102(b) as being anticipated by Chung et al. (U.S. 6,231,989 B1, hereinafter 'Chung').

3. Regarding claim 35, this is a product-by-process claim and as such, will be examined for the structural limitations implied by the process steps of the claim upon which this claim depends from (see MPEP 2113). In this case, the process steps (of claim 12) imply forming a dielectric layer on a substrate wherein the dielectric constant of the layer is less than 2.1. Chung discloses forming an insulating layer on a substrate, wherein the dielectric constant of the layer is less than 2.1 (col 1, lines 4-12; col 12, lines 28-32).

Allowable Subject Matter

4. Claims 12-34 are allowed.

5. Claim 12 is allowable because of the limitation of coating a substrate with a solution comprising an incompletely condensed polyhedral silsesquioxane according to formula (1) or (2) given in the claim. The closest prior art of record is Jost et al. (WO 03/042223 A1, published 5/22/03; English equivalent U.S. 2005/0010012 A1). Jost et

al. similarly discloses using an incompletely condensed polyhedral silsesquioxane but differs from the instant invention in that the incompletely condensed polyhedral silsesquioxane is reacted with an alkoxysilane and polymerized, and whereby the resultant polymerized compound is coated on a substrate.

6. Claims 13-34 depend on claim 12.
